Yong-Han Lin (she/her) https://yonghanlin.github.io/ | yon9hanlin@gmail.com

Research Interests

My research interests lie broadly in Human-Computer Interaction (HCI) and Human-centered AI. I am interested in investigating the challenges in people's interactions and reliance on automated systems. My research goal is to 1) give people more autonomy when using automated systems, and 2) design automated technologies that adapt to personalized needs across various contexts.

Education

National Yang-Ming Chiao-Tung University* (NYCU) Sept. 2018 - June 2022
B.S. in Computer Science Hsinchu, Taiwan

- **Overall GPA**: 3.84/4.3 | **Major GPA**: 3.91/4.3 | **Last 60 Credits**: 4.07/4.3
- **Selected Coursework**: Data Structures, Database Systems, Operating Systems, Machine Learning, Natural Language Processing, User Experience & Usability Evaluation, CSCW Research Summer Institute

***Former name: National Chiao Tung University (NCTU)**

Research Experience

NYCU Mobile Ubiquitous Interaction Lab, Undergraduate Researcher/Research Assistant Sep. 2020 - Present
Advisor: Dr. Yung-Ju (Stanley) Chang Hsinchu, Taiwan

- Conducted studies using the experience-sampling method (ESM), diaries, and interviews to investigate users' perceptions of automatic, manual, and hybrid notification management methods, and the findings resulted in a first-author full paper submission to 2024 IMWUT [J.1] and a poster presented at the 2023 UbiComp/ISWC conference [P.1]
- Led 3 college students and 1 graduate student to research and build an Android application that provides automatic sorting and categorization capabilities by the implementation of the BERT model and Flask, while also enabling manually pin, sort, and categorize notifications [project site]
- Employed thematic analysis to identify users' strategies for customizing mobile notification alerts, and the findings resulted in a full paper submission to 2024 MobileHCI conference [C.3]
- Researched and conducted mixed-methods analysis on users' notification interactions in multi-device environments, and the findings resulted in a paper at the 2023 CHI conference [C.2]

Polytechnique Montreal Human-Centered Design Lab, Research Intern June 2021 – Jan. 2022
Advisor: Dr. Jinghui Cheng Remote

- Conducted a qualitative content analysis and a statistical analysis to understand the usage, purposes, and impacts of visual artifacts in GitHub issue tracker system, the findings resulted in a paper at the 2022 EASE conference [C.1]

Teaching Experience

Teaching Assistant
NYCU CS 1270: Introduction to Database Systems (Spring 2022)
Instructor: Dr. Yi-Ju Tseng

Course Assistant
NYCU General Education: Critical and Creative Thinking (Spring 2021)
Instructor: Dr. Jonathon Hricko

Honors and Awards

Cornell, Maryland, Max-Planck Pre-doctoral Research School Invitation (Summer 2024)
Awarded a travel grant to participate in person at Max-Planck Institute to learn about cutting-edge research in computer science

Taiwan National Science and Technology Council Research Grant Award (Fall 2021)
Awarded a grant for doing research on studying users' perception of automatic and manual notification management methods

Polytechnique Montreal Research Internship Scholarship (Summer 2021)
Awarded a scholarship for doing research on improving the usability of scientific open source software

Volunteer and Leadership

Student Volunteer
CHI 2023, Hamburg
Provided support for paper session, hybrid Zoom meeting, and exhibit hall

CSCW 2022, Virtual
Monitored paper presentation video on YouTube livestream, and provided quick responses in GatherTown

Team Leader in Public Relation
Mei-Chu Hackathon 2020
Led a team of 6 students to contact corporate sponsorship and received 40K+ USD from Google, Amazon, etc

Industry Experience

Software Engineering Intern Jan. 2021 – June 2021
Xaduro Inc. (*travel tech startup)* Taipei, Taiwan

- Collaborated with the engineering team to develop a travel agency system that allows 1K+ users by using MySQL, PHP, and JavaScript
- Optimized the hotel reservation system by fixing 80% of the usability issues detected from Google Search Console

Skills

Programming Languages : Python, JavaScript, R, Java, C++/C, SQL, PHP, HTML, CSS

Tools : Android, Git, Firebase, Flask, Linux, LaTeX
