Education

University of Illinois Urbana-Champaign *Aug 2025 - May 2027*
Master of Computer Science *GPA: 3.81/4.0*

- Relevant Courses: Applied Machine Learning, Cloud Computing, Software Engineering, Data Management, Information Retrieval
- Selected Awards: The Linux Foundation's Registration Scholarship and Travel Fund for Open Source Summit North America 2026

National Yang Ming Chiao Tung University *Sep 2018 - Jun 2022*
Bachelor of Science in Computer Science *GPA: 3.84/4.3*

- Relevant Courses: Data Structures, Algorithms, Object-Oriented Programming, Operating Systems, Computer Organization, Database Systems (Teaching Assistant), Computer Networks, Natural Language Processing, User Experience Design
- Selected Awards: Taiwan National Science and Technology Council Student Research Award 2021

Work & Research Experience

Graduate Research Assistant *Sep 2026 - Present*
Prof. Mashfiqui Rabbi's Lab, University of Illinois Urbana-Champaign *Urbana, Illinois*

- Build data processing workflows for wearable sensor data from 50k+ individuals to extract and cluster time-series embeddings.
- Develop research platform integrating Fitbit APIs and OAuth with Flask, PostgreSQL, and AWS for longitudinal user studies.

Software Engineer Intern *May 2026 - Aug 2026*
HERE Technologies (formerly Nokia Maps; now majority-owned by BMW, Audi, and Mercedes-Benz) *Chicago, Illinois*

- Shipped user-facing features for routing app used worldwide, integrating vehicle sensor data and real-time progress streaming.
- Built notification system into existing platform, reducing data-change delivery time by 67% for internal & external stakeholders.

Research Assistant *Jul 2022 - Jun 2025*
Agentic Intelligence for Mobile Engagement and EXperience Lab, National Yang Ming Chiao Tung University *Hsinchu, Taiwan*

- Led team of four to build intelligent notification system; published 5 papers on notification design at top-tier HCI conferences.
- Analyzed 100k+ notification records and app logs quantitatively to identify interaction patterns for notification feature design.
- Built experience sampling and in-app questionnaire features for Android apps, enabling in-situ collection of user feedback.

Software Engineer Intern *Jun 2021 – Dec 2021*
Xaduro Inc. (travel tech startup) *Taipei, Taiwan*

- Built hotel search platform with MySQL, JavaScript, and PHP, helping 500+ B2B hotel customers promote their services.

Selected Projects

NotiManager [project site] [paper] | Java, Python, Android SDK, Flask, Google Cloud, Firebase, BERT, R

- Developed intelligent notification system with pinning, sorting, and categorizing features, and evaluated through three-week user study with 30 participants, resulting in **first-author paper published at ACM UbiComp 2024** (top-tier conference).

Java Flaky Test Fixes (Open Source) | Java, Git

- Detected and fixed 30+ flaky tests across 9 GitHub repositories, including OpenAPI Generator, Apache ShenYu, and Esoteric Software Kryo; over 80% of pull requests were accepted and merged by repository maintainers.

Context-Aware Video Recommender [project site] | Python, Flask, Gemini, CLIP, RAG

- Built full-stack LLM-powered recommendation system using Gemini, CLIP, Flask, and YouTube Data API, converting user context into weighted search queries, retrieving and ranking videos, and implementing query caching to reduce API usage.

Technical Skills

Programming : Python, Java, Kotlin, Swift, JavaScript, TypeScript, SQL, Shell Scripting, HTML/CSS, C/C++
Frameworks & Tools : Flask, FastAPI, Spring Boot, React.js, Node.js, Android SDK, Maven, Git, Claude, GitHub Copilot, Codex
Cloud & Infrastructure : AWS, Google Cloud, PostgreSQL, MySQL, MongoDB, Docker, Kubernetes, Kafka, Spark, CI/CD, Linux
