Education

University of Illinois Urbana-Champaign

Aug 2025 - May 2027

Master of Computer Science

GPA: 4.0/4.0

- Relevant Course: Applied Machine Learning, Cloud Computing, Deep Learning, Information Retrieval, Software Engineering
- Teaching Experience: Course Assistant of CS 411 Database Systems (Fall 2025)

National Yang Ming Chiao Tung University

Sep 2018 - Jun 2022

Bachelor of Science in Computer Science

GPA: 3.84/4.3

- Relevant Course: Data Structures, Algorithms, Object-Oriented Programming, Operating Systems, Database Systems, Computer Organization, Computer Networks, Image Processing, Natural Language Processing, User Experience Design
- Awards: Taiwan National Science and Technology Council Student Research Award (Fall 2021)

Work & Research Experience

Software Engineer Intern

May 2026 - Aug 2026

HERE Technologies

Chicago, Illinois

- Implement features for routing app that integrates vehicle sensors, streams progress data, and uses HERE Navigate SDK.

Graduate Research Assistant

Jan 2026 - May 2026

Siebel School of Computing and Data Science, University of Illinois Urbana Champaign

Urbana, Illinois

- Analyzed data from 50k+ people using SQL, Python, and Google Cloud BigQuery to guide personalized intervention design.
- Developed web-based research app using Fitbit API, Python, Flask, PostgreSQL, and AWS to enable data collection in-the-wild.

Undergraduate Research Assistant

Jul 2022 - Jun 2025

Department of Computer Science, National Yang Ming Chiao Tung University

Hsinchu, Taiwan

- Led team of four to build intelligent notification system; published 5 papers on notification design at top-tier HCI conferences.
- Constructed and analyzed 100k+ notification data and app logs to identify interaction patterns for notification feature design.
- Built experience sampling and in-app questionnaire features for Android apps, enabling in-situ collection of user feedback.

Software Engineering Intern

Jun 2021 - Dec 2021

Xaduro Inc.

Taipei, Taiwan

- Collaborated with team of six to build hotel search platform using MySQL, JavaScript, and PHP, benefiting 500+ hotel partners.

Selected Projects

NotiManager [[project site](#)] | Java, Python, Android SDK, Flask, Google Cloud Firebase, BERT, R

- Developed intelligent notification management system with pinning, sorting, and categorizing features, and evaluated through three-week user study with 30 participants, resulting in **first-author paper published at ACM UbiComp 2024**.

Java Flaky Test (open source) | Java, Git

- Detected and fixed 30+ flaky tests across 9 GitHub repositories, including [OpenAPI Generator](#), [Apache ShenYu](#), and [Esoteric Software Kryo](#); over 80% of pull requests were accepted and merged by repository maintainers.

Context-Aware Video Recommender [[project site](#)] | Python, Flask, Gemini, CLIP

- Built full-stack web app for context-aware YouTube recommendations using Gemini, YouTube Data API, and CLIP, converting user contexts into LLM-augmented weighted search queries and implementing query caching to reduce API usage.

Technical Skills

Programming : Python, Java, Kotlin, SQL, JavaScript, TypeScript, Shell Script, PHP, HTML/CSS

Frameworks : Flask, FastAPI, React.js, Node.js, jQuery, PyTorch, TensorFlow, Scikit-Learn, Large Language Models

Software & Tools: Android SDK, Git, Google Cloud Platform, Amazon Web Services, Docker, Linux, Claude, Copilot

Database Management : MySQL, PostgreSQL, SQLite, MongoDB, Firebase, Neo4j
